

60 Years of Service to ACS

October 16, 2019

Lucy Eubanks, Lecturer Emerita

Lecturer Emerita Earns Recognition for 60 Years of Service

Lucy Eubanks, Lecturer Emerita of Chemistry, was recently recognized at the regional American Chemical Society (ACS) meeting on September 17, 2019 for her 60 years of service to ACS. Over the past 60 years, she has participated in several ACS curriculum projects, including [*Chemistry in the Community*](#) and [*Chemistry in Context*](#), where she served for two editions as Editor-In-Chief and Senior Author. She has received a national CATALYST award for teaching excellence and is co-recipient of a national award for distinguished service to the ACS Division of Chemical Education. She is a past chair of that Division and has served the Western Carolinas ACS Local Section as Chair, Alternate Councilor, and Councilor. Mrs. Eubanks brought notice to the Section with her leadership roles on the ACS Local Section Activities Committee and the ACS Leadership Advisory Board. Lucy currently serves on the Emeritus College Executive Committee and Advisory Board. Click [HERE](#) to view her award.

AMERICAN CHEMICAL SOCIETY

Presents

Ms. Lucy Pryde Eubanks

with this Certificate of Recognition
on behalf of the ACS Board of Directors
in grateful appreciation for

Sixty Years of Service

Bonnie A. Charpenier, Ph.D.
2019 President
American Chemical Society
Thomas M. Connelly, Jr.
Executive Director & CEO
U.S.

January 1, 2019

Lucy Eubanks earned her B.A. in chemistry (magna cum laude, Phi Beta Kappa) from Mount Holyoke College in South Hadley, MA, and her M.S.N.S. from Seattle University. Lucy's teaching career spanned the globe from Bryn Mawr, PA; to Frankfurt, Germany; to Seattle, WA; to San Diego, CA; to Stillwater, OK, and finally to Clemson, SC. Here she served as Associate Director of the ACS Division of Chemical Education Examinations Institute and specialized in developing, teaching, and assessing outcomes of a course for non-science majors within Clemson's Chemistry Department. Her interest in helping non-science majors appreciate chemistry's role in understanding societal issues started early in her career. This led her to write one of the first books with this theme for college non-science majors, *Environmental Chemistry: An Introduction*. This passion has guided her participation in several ACS curriculum projects, including *Chemistry in the Community* and *Chemistry in Context*, where she served for two editions as the Editor-in-Chief and Senior Author. She has received a national CATALYST award for teaching excellence and is co-recipient of a national award for distinguished service to the ACS Division of Chemical Education. She is a past chair of that Division and has served our Western Carolinas ACS Local Section as Chair, Alternate Councilor, and Councilor. Lucy brought notice to our Section with her leadership roles on the ACS Local Section Activities Committee and the ACS Leadership Advisory Board. Lucy is now retired as Lecturer Emerita from Clemson University and serves on the Executive Committee and Advisory Board for Clemson's award-winning Emeritus College .
